

## AFRICA

Ever heard of Ethiopia? Birthplace of coffee cultivation, a gazillion varieties you've never heard of, dancing goats all over the place.... And known for two radically different flavor profiles: the crazy naturals, with their berries and chocolate and red wine and stuff, and sophisticated washed coffees, hinting at every tea on the shelf.

### **Ethiopia Washed Sidamo**

When it comes to washed Ethiopian coffees, we like the classics. Floral with a tea-like mouthfeel and a hint of spice in the finish.
