

BLEND

Premium Espresso Blend

The old-fashioned approach to decaf espresso was: take whatever you had lying around, roast it really slow and dark, and blame the results on decaf in general. We couldn't let this go unchecked.

With our Premium Espresso Blend, you get coffee that shows balance, depth and liveliness at a range of roasts. Brazil on rhythm guitar, washed Latins playing lead, Indo/Asia on bass, and a dose of exotic naturals playing tambourine. The tasty result: chocolate and caramel flavors with a touch of natural fruit, just enough acidity to provide a balance of sparkle, and sweetness riding a long, smooth finish.

Pull shots with enough depth and sustaining crema you'll be surprised its decaf. Amaze your friends!

Cascadia Blend Fair Trade Organic

Ethically-sourced, certified organic coffees from the most reputable cooperatives in Latin America, Indonesia and Africa are brought together in a United Nations of coffee harmony, producing a big-bodied sweet cup.

Brewing Cascadia Blend? Look for herbal notes and dark chocolate.

Using Cascadia Blend as FTO espresso? You get citrus and cherry, plus those herbal notes again, as well as a bonus treacle-like mouthfeel. This marvel performs just as well as a straight shot as it does in a large latte.
